CONTENTS OF VOL. 68 Nos 1–6

NUMBER 1—JULY
PART A

Spatial variations in the oxygen content of $YBa_2Cu_3O_{7-\delta}$ epitaxially deposited on MgO as assessed using a transmission electron microscopy moiré method
By E. J. Williams and W. M. Stobbs 1

Generation and dissociation of dislocations in $YBa_2Cu_3O_{7-\delta}$ single crystals and deformed oriented powders
By H. Gu, C. Colliex, S. Senoussi, C. Aguillon-Levillain and P. Manuel 19

Effects of shear stresses on crack-growth microstructures in transformation-toughened ceramics
By D. M. Stump and R. A. La Violette 35

Edge dislocation near an elliptic inhomogeneity with either an adhering or a slipping interface. A comparative study
By L. Stagni 49

Electron channelling contrast imaging of interfacial defects in strained silicon–germanium layers on silicon
By A. J. Wilkinson, G. R. Anstis, J. T. Czernuszka, N. J. Long and P. B. Hirsch 59

Dislocation dissociation in cubic Al_3Ti alloys
By D. G. Morris and S. Gunther 81

TEM *in situ* investigation of dislocation mobility in II–VI semiconductor compound ZnS. Cathodoplastic effect and the Peierls mechanism
By A. Faress, C. Levade and G. Vanderschaeve 97

Investigation of the climb of extended dislocations during high-temperature creep
By Q. P. Kong and Y. Li 113

Electron microscopy of ultra-thin buried layers in InP and InGaAs
By N. Grigorieff, D. Cherns, M. J. Yates, M. Hockly, S. D. Perrin and M. R. Aylett 121

Growth of grain-boundary precipitates in Cu–Fe–Co bicrystals
By T. Fujii, M. Moriyama, M. Kato and T. Mori 137

High-resolution transmission electron microscopy study of twin-boundary structures in epitaxial $NiSi_2$ thin films
By W. J. Chen, F.-R. Chen and L. J. Chen 151

Planar defects in {113} planes of $L1_0$ type TiAl. Their structures and energies
By Z. C. Li and S. H. Whang 169

Formation of dislocation loop at 800°C in $L1_0$ $Ti_{35}Al_{55}V_{10}$ compound
By S. H. Whang and Y. D. Hahn 183

Misfit dislocations in two phase superalloys with high volume fraction of the ordered phase
By G. Scheunemann-Frerker, L. Müller and M. Feller-Kniepmeier 193

Plastic deformation in polyethylene crystals studied by microindentation hardness
By C. Santa Cruz, F. J. Baltá Calleja, T. Asano and I. M. Ward 209

Announcement 225

PART B

A note on the first-order Born approximation for scattering by defects in crystals
By A. Lakhtakia 1

Basis and applications of isothermal averaging in transport at low and high electric fields
By V. Dallacasa 7

Domain size modelling in $YBa_2Cu_3O_{7-\delta}$ powders and powdered single crystals by means of X-ray diffraction
By M. Rand, J. I. Langford and J. S. Abell 17

Oxidation of a-Si:H. Stress behaviour in the grown oxide
By A. Szekeres, K. Christova and P. Danesh 29

New nickel-related optical absorption in high-pressure synthetic diamond
By S. C. Lawson, H. Kanda and M. Sekita 39

Non-ohmic hopping conductivity in disordered systems
By D. Bourbie 47

Enhancement of photoconductivity in r.f. glow-discharge-deposited a-SiC:H films doped with nitrogen
By I. Nakaaki, N. Saito, Y. Inui, S. Yoshioka and S. Nakamura 55

Structural characterization of chemically synthesized cubic lanthanum sulphide (γ-La_2S_3)
By P. N. Kumta, V. P. Dravid and S. H. Risbud 67

Complex alloy phases for binary hard-disc mixtures
By C. N. Likos and C. L. Henley 85

The effect of nucleation models on dynamic recrystallization. I. Homogeneous stored energy distribution
By P. Peczak and M. J. Luton 115

Book reviews 145

NUMBER 2—AUGUST
PART A

Self-developing processes in metal fluorides under a focused electron beam
By V. I. Nikolaichik 227

Dislocation configurations in two phase TiAl alloys. I. Annealed and indented structures
By M. A. Morris 237

Dislocation configurations in two phase TiAl alloys. II. Structures after compression
By M. A. MORRIS 259

O-lattice analyses of interfacial misfit. I. General considerations
By W.-Z. ZHANG and G. R. PURDY 279

O-lattice analyses of interfacial misfit. II. Systems containing invariant lines
By W.-Z. ZHANG and G. R. PURDY 291

Measurements of antiphase boundary and complex stacking fault energies in binary and B-doped Ni_3Al using TEM
By K. J. HEMKER and M. J. MILLS 305

Defect structures in single crystal TiC
By F.-R. CHIEN, S. R. NUTT and D. CUMMINGS 325

Microstructure and mechanical properties of Ni–11·8 at.% Ti single crystals
By M. LAMBRIGGER 349

HREM study of dispersoids in cryomilled oxide dispersion strengthened materials
By O. SUSEGG, E. HELLUM, A. OLSEN and M. J. LUTON 367

Effect of dilute solute additions on loop formation from heavy-ion produced displacement cascades in Ni
By J. S. VETRANO, I. M. ROBERTSON and M. A. KIRK 381

Transmission electron microscopy study of the activated slip systems and the dislocation structures in B2-type CoZr and CoHf polycrystals
By M. YOSHIDA and T. TAKASUGI 401

Deformation twinning in high-hydrogen-solubility refractory alloy crystals
By K. JAGANNADHAM, R. W. ARMSTRONG and J. P. HIRTH 419

PART B

The mean normalized Euler characteristic of a simultaneously starting and growing 2D Voronoi tessellation with Poisson-distributed nuclei
By G. E. W. SCHULZE, L. O. SCHWAN and P. FRANKE 149

Calculated stacking-fault energies in α-Al_2O_3
By P. R. KENWAY 171

High-resolution transmission electron microscopy study of chemically deposited cadmium sulphide thin films from aqueous ammonia solutions
By D. LINCOT, R. ORTEGA-BORGES and M. FROMENT 185

Note on the magnetism of UCu_2Ge_2
By M. KUZNIETZ, H. PINTO and M. MELAMUD 195

Density-of-state distribution and variable-range hopping transport in amorphous silicon prepared by ion bombardment
By B. RUTTENSPERGER, G. MÜLLER and G. KRÖTZ 203

Blackening of tin oxide thin films heavily doped with antimony
By M. KOJIMA, H. KATO and M. GATTO 215

On the origin of enhanced specific heat in nanocrystalline platinum
By A. TSCHÖPE and R. BIRRINGER 223

The production of repetitive surface features by oblique incidence ion bombardment
By G. CARTER, M. J. NOBES and I. V. KATARDJIEV 231

Theory of magnetostriction with applications to $Tb_xDy_{1-x}Fe_2$
By R. D. JAMES and D. KINDERLEHRER 237

Electron charge distribution of chromium
By A. G. FOX 275

Non-Arrhenius temperature dependence of conductivities in amorphous systems
By GU XU 285

NUMBER 3—SEPTEMBER
PART A

Use of quasi-Bloch wave packages for description of fast electron diffraction in a crystal with defects
By N. I. BORGARDT 453

Intersections of deformation twins in TiAl. I. Experimental observations
By Y. Q. SUN, P. M. HAZZLEDINE and J. W. CHRISTIAN 471

Intersections of deformation twins in TiAl. II. Models and analyses
By Y. Q. SUN, P. M. HAZZLEDINE and J. W. CHRISTIAN 495

Transmission electron microscopy study of the microstructure and dislocation configuration in $Al_{67}Co_8Ti_{25}$
By YING GAO, JING ZHU and D. E. MIKOLLA 517

The use of superlattice reflections for weak beam microscopy
By A. H. W. NGAN and I. P. JONES 525

Atomistic modelling of cavitation of glassy polymers
By P. H. MOTT, A. S. ARGON and U. W. SUTER 537

Computer simulation of thin film heteroepitaxial ceramic interfaces using a near-coincidence-site lattice theory
By T. X. T. SAYLE, C. R. A. CATLOW, D. C. SAYLE, S. C. PARKER and J. H. HARDING 565

Description of the elastic properties of polycrystals by means of irreducible spherical tensors
By M. HUMBERT, L. ZUO, J. MULLER and C. ESLING 575

Structure analysis of $\{1\bar{1}01\}$ twins in evaporated titanium thin films
By Y. KASUKABE, Y. YAMADA, PENG JU LIN and L. A. BURSILL 587

Dislocation density field–stress field relationships for non-uniform elastic–plastic deformation
By J. A. HURTADO and J. WEERTMAN 599

The atomic structure of $\Sigma=1$ and $\Sigma=3$ $NiSi_2$/Si interfaces
By WEN-JAUH CHEN and FU-RONG CHEN 605

PART B

Magnetoacoustic oscillations in indium due to the frequency dispersion
By V. V. GUDKOV and A. V. TKACH 291

On the spinodal decomposition in zirconia–yttria (ZrO_2–Y_2O_3) alloys
By M. DOI and T. MIYAZAKI 305

Evidence of intermediate states between approximant crystal and quasicrystal
By P. DONNADIEU and C. DEGAND 317

Infrared vibrational spectra of hydrogenated amorphous and microcrystalline silicon–carbon alloys. A comparison of their structure
By F. DEMICHELIS, G. CROVINI, C. F. PIRRI and E. TRESSO 329

Hopping in exponential bandtails in high electric fields and transport models in amorphous silicon
By R. I. DEVLEN, H. ANTONIADIS, E. A. SCHIFF and J. TAUC 341

Statistical properties of the Anderson transition. Numerical results
By P. MARKOŠ and B. KRAMER 357

Electron dislocation drag in thin metal samples
By A. A. KROKHIN, L. N. GUMEN, V. P. LEBEDEV and V. S. KRYLOVSKII 381

Twinned structure in $Al_{75}Cu_{10}Cr_{15}$ exhibiting decagonal symmetry
By J. J. HU and P. L. RYDER 389

A molecular dynamics study of pristine and doped polyacetylene
By G. SESÉ and C. R. A. CATLOW 397

Evaluation of physical and electrical properties of $CoSi_2$ thin films on (100)Si grown by pulsed laser deposition
By P. TIWARI, R. SINGH and J. NARAYAN 413

Book reviews 421

NUMBER 4—OCTOBER
PART A

Preface 631

The crystal chemistry of non-stoichiometric oxides with the low-temperature Ta_2O_5 structure
By G. HARBURN, R. J. D. TILLEY and R. P. WILLIAMS 633

Chemical and physical implications of cationic and anionic modifications in perovskite related metal oxides
By A. Reller 641

***Ab initio* Hartree–Fock calculations of CaO, VO, MnO and NiO**
By W. C. Mackrodt, N. M. Harrison, V. R. Saunders, N. L. Allan, M. D. Towler, E. Aprà and R. Dovesi 653

Simulation studies of lithium intercalation in transition metal oxides
By M. Saiful Islam 667

Computer simulation studies of alkali and alkaline-earth metal intercalation into uranium oxides
By R. G. J. Ball 677

Defect energies for pure corundum and for corundum doped with transition metal ions
By P. W. M. Jacobs and E. A. Kotomin 695

Ion dynamics and correlations. Translational and localized ionic hopping motion in solid electrolytes
By K. Funke 711

Point defects and transport in haematite ($Fe_2O_{3-\varepsilon}$)
By Rüdiger Dieckmann 725

Tracer diffusion and defect structure in Ga-doped CoO
By R. Schmackpfeffer and M. Martin 747

Spectroscopic *in situ* studies of defect-dependent properties of transition metal oxides. Defects, diffusion, and reaction kinetics
By K. D. Becker 767

Thermoelectric power studies of bismuth oxide and mixed oxides based on bismuth oxide
By A. V. Chadwick and A. J. Francklin 787

Structural calculations of oxide surfaces at finite temperature
By P. A. Mulheran 799

Diffusion of isotopes in surface layers of some oxides
By V. S. Stubican 809

PART B

An adiabatic model of dispersive hopping transport. I. General results for weak-field drift and diffusion
By V. I. Arkhipov and H. Bässler 425

Linear and nonlinear elastic properties of antiferromagnetic γ-manganese–nickel alloys
By G. A. Saunders and M. D. Salleh 437

Charge density topology and its relationship to properties in intermetallic alloys
By M. E. Eberhart, D. P. Clougherty and J. M. MacLaren 455

Mechanisms of electronic conduction through thin film ZnS:Mn
By A. J. Simons and C. B. Thomas 465

Structural analysis of quasicrystals and approximants in AlCu(Ru, Fe) systems
By A. SADOC, C. BERGER and Y. CALVAYRAC 475

Growth morphology of icosahedral Al–Mn–Pd single quasicrystals
By C. BEELI and H.-U. NISSEN 487

Structure of a metastable Al–Ge phase determined from large angle CBED patterns
By R. VINCENT and D. R. EXELBY 513

Photodarkening in glassy $(Ge_{0.95}Sn_{0.05}Se_2)_{1-x}Cu_x$ films
By J. GAN and D. ISLAM 529

Non-equilibrium relaxation dynamics in the spin glass and ferromagnetic phases of *Cr*Fe
By P. D. MITCHLER, R. M. ROSHKO and W. RUAN 539

Raman spectroscopic studies of As_2S_3 and Li_2S–As_2S_3 glasses
By M. C. R. SHASTRY, M. COUZI, A. LEVASSEUR and M. MÉNÉTRIER ... 551

The origin of reversible and irreversible photostructural changes in chalcogenide glasses
By H. FRITZSCHE 561

NUMBER 5—NOVEMBER
PART A

Computer simulation of collective correlation effects for diffusion in a random alloy
By Z. QIN and G. E. MURCH 819

Computer simulation of tracer diffusion in a binary ordered alloy with an equilibrium concentration of vacancies
By Z. QIN and G. E. MURCH 831

The role of melting temperature and electron–phonon coupling in the formation of clustered vacancy defects from heavy-ion-generated displacement cascades
By I. M. ROBERTSON, D. K. TAPPIN and M. A. KIRK 843

On dislocation damping at low frequencies
By G. CAGNOLI, L. GAMMAITONI, F. MARCHESONI and D. SEGOLONI 865

Plasticity of single crystals of Fe_2(Dy, Tb) Laves phase at high temperatures
By H. SAKA, T. HAYAKAWA, M. NAKAMURA, H. MIZUTANI and E. NAKAMURA 871

Sierpinski fractal description of the martensitic transformation
By Q. Y. LONG, Y. H. WEN, Z. ZHU, X. M. ZHANG, Z. Q. MU and C. W. LUNG 885

Energy analysis of the kinetic path of diffusion-controlled phase transformations
By TORU MIYAZAKI and TOSHIYUKI KOYAMA 891

Diffusion of silicon, germanium and tin in β-titanium
By YOSHIAKI IIJIMA, SUNG-YUL LEE and KEN-ICHI HIRANO 901

Deformation twinning intersections in a γ-TiAl-based Ti–50 at.% Al–2 at.% Mn–1 at.% Nb alloy deformed at room temperature
By Y. G. ZHANG and M. C. CHATURVEDI 915

Internal friction of copper bicrystals with [001] twist boundaries
By MASAHARU KATO and T. MORI 939

Electrical activity and microstructure of a faceted $(\bar{1}11)$–$(1\bar{1}2)$, $\Sigma=3$ twin boundary in aluminium-doped silicon
By J.-L. MAURICE 951

Structure of perovskite carbide and nitride precipitates in $L1_0$-ordered TiAl
By W. H. TIAN, T. SANO and M. NEMOTO 965

Reactions of cube dislocations in the $L1_2$ intermetallic compound Fe_3Ge
By A. H. W. NGAN, I. P. JONES and R. E. SMALLMAN 977

Use of weak Bragg reflections for analysing superlattice dislocations in $Ni_3(Al, Ti)$
By A. KORNER, D. J. H. COCKAYNE and Y. Q. SUN 993

Indentation fatigue. A simple cyclic Hertzian test for measuring damage accumulation in polycrystalline ceramics
By F. GUIBERTEAU, N. P. PADTURE, H. CAI and B. R. LAWN 1003

Microtwin sequences in thermoelastic Ni_xAl_{100-x} martensite studied by conventional and high-resolution transmission electron microscopy
By D. SCHRYVERS 1017

A transmission electron microscopy study of a dislocation dipole and dislocation pairs in an $Al_{70}Co_{15}Ni_{15}$ decagonal quasicrystal
By YANFA YAN and RENHUI WANG 1033

The grain boundary structure between the β-precipitates in Ni–12 at.% Be alloy
By J. G. ZHENG, Z. G. LIU, Q. LI, D. FENG and G. J. SHEN 1039

Temperature-dependent solute segregation in dilute Cu–Be under self-ion irradiation: a quantitative revision
By R. KOCH 1045

Coherent electron nanodiffraction from perfect and imperfect crystals
By J. M. ZUO and J. C. H. SPENCE 1055

Planar defects induced by heavy-ion irradiation
By YIMEI ZHU, HONG ZHANG, M. SUENAGA and D. O. WELCH 1079

Grain evolution in two-phase systems
By G. CARTER 1091

PART B

Uniform and filamentary transport in d.c. thin-film ZnS:Mn electroluminescent devices
By M. BEALE 573

Pentagonal phases as a transient state of the reversible icosahedral–rhombohedral transformation in Al–Fe–Cu
By N. MENGUY, M. AUDIER, P. GUYOT and M. VACHER..... 595

AlPdMn phase diagram in the region of quasicrystalline phases
By M. AUDIER, M. DURAND-CHARRE and M. DE BOISSIEU..... 607

NaCl and filled Re_3B-type structures for two metastable chromium carbides
By E. BOUZY, E. BAUER-GROSSE and G. LE CAËR 619

Onset of nonlinear hopping conduction in *R*-percolation
By J. TALAMANTES and M. POLLAK 639

Studies of (Ce, U)Al_2 alloys. Resistivity and susceptibility measurements
By J.-G. PARK 653

Temperature and pressure variations of the elastic constants of KBr
By TAI-HYUNG KWON 663

Impurity correlation factors and their relationship to the isotope effect in a binary ordered alloy
By Z. QIN and G. E. MURCH 677

Photoinduced instabilities in chalcogenide glasses for optical recording media
By M. MARJAN, A. KIKINESHI and A. MISHAK..... 689

The orthorhombic ($Al_{11}Mn_4$)–Pd decagonal approximant
By T. L. DAULTON and K. F. KELTON..... 697

Confined motion of a magnetic dipole in an infinite rectangular hole through a superconductor
By Z. J. YANG, D. J. W. GELDART, R. A. DUNLAP and HONGTAO JIANG 713

Substitutional donor related states and Au/Ge/Ni contacts to $Al_xGa_{1-x}As$
By L. V. A. SCALVI and M. H. DEGANI..... 727

Characterization of interface properties in a-Si:H/a-Si_xC_{1-x}:H multilayers by the constant photocurrent method
By F. WANG, T. FISCHER, T. MUSCHIK and R. SCHWARZ..... 737

The influence of inter-oligomer separation distance on observed hopping mobilities in terthiophene-doped polycarbonate
By D. M. GOLDIE, A. R. HEPBURN, J. M. MAUD and J. M. MARSHALL 753

Thermal conductivity of rare gas crystals. The role of three-phonon processes
By M. OMINI and A. SPARAVIGNA..... 767

Formation of barrier anodic films on aluminium in antimonate electrolyte
By M. SKELDON, P. SKELDON, G. E. THOMPSON, G. C. WOOD and K. SHIMIZU 787

Book reviews 805

Erratum 809

NUMBER 6—DECEMBER
PART A

Computer simulation of the motion of screw dislocations in Ni_3Al
By C. T. CHOU and P. B. HIRSCH 1097

On the presence of fine matrix channels in Ni-based superalloys and their effect on shearing processes of γ' precipitates
By B. DÉCAMPS and A. J. MORTON 1129

High-resolution electron microscopy of the $\Sigma = 5$ [001](310) grain boundary in NiAl
By R. W. FONDA and D. E. LUZZI 1151

A model for the formation mechanism of depleted zones with a high concentration of vacancies in displacement cascades in metals
By V. G. KAPINOS and D. J. BACON 1165

Analysis of the cooperative grain boundary sliding in terms of cellular dislocations
By M. G. ZELIN and A. K. MUKHERJEE 1183

The decomposition kinetics of Cu–1 at.% Co at 823 K, studied by bright-field–zone-axis-incidence transmission electron microscopy
By R. HATTENHAUER and P. HAASEN 1195

Scaling regimes and anomalies of wedge disclination stresses in anisotropic rotationally inhomogeneous media
By A. YU. BELOV 1215

Dependence of the high-frequency components of the magnetoelastic voltage on plastic deformation and stress amplitude during stepwise cyclic stressing of ferromagnetic material
By P. RUUSKANEN and P. KETTUNEN 1233

Dissociation of misfit dislocation nodes in (111)GeSi/Si interfaces
By F. ERNST 1251

On the formation of edge dislocations in $In_xGa_{1-x}As/GaAs$ heterostructures with $x < 0{\cdot}20$
By C. ULHAQ-BOUILLET and A. LEFEBVRE 1273

Anisotropic analysis of dislocation line energies and possible dislocation core dissociations in $MoSi_2$
By S. I. RAO, D. M. DIMIDUK and M. G. MENDIRATTA 1295

Dislocation relaxation in cobalt and cadmium polycrystals
By M. H. YOUSSEF and P. G. BORDONI 1315

The variants, domains and defects in the CoSi//Si(111) epitaxial system
By A. C. DAYKIN and C. J. KIELY 1331

Direct observation of 1/2⟨110⟩ dislocations occurring at steps in thin film type-*B* $CoSi_2$//Si(111) interfaces
By A. C. DAYKIN and C. J. KIELY 1345

A theoretical study of H-centre migration in alkali halide crystals KCl and NaCl
By E. A. KOTOMIN, V. E. PUCHIN and P. W. M. JACOBS 1359

PART B

Preface 811

Growth of crystals from amorphous alloys
By L. BATTEZZATI and M. BARICCO 813

Preparation and thermal stability of nanocrystalline Cu alloys
By B. GÜNTHER, G. VELTL and H.-D. KUNZE 825

X-ray diffraction study on the amorphization of the $Pd_{80}Si_{20}$ powder mixture by mechanical alloying
By S. MARTELLI, W. GUO, M. MAGINI, F. PADELLA and D. ZEDDA 833

Phase stability of Ni–Al solid solutions
By V. ROSATO, F. CARDELLINI and F. CLERI 845

Nanocrystalline $Fe_{73.5}Cu_1Nb_3Si_{13.5}B_9$ obtained by direct-current Joule heating. Magnetic and mechanical properties
By P. ALLIA, M. BARICCO, M. KNOBEL, P. TIBERTO and F. VINAI 853

Effect of as-cast topological disorder on the magnetic properties of nanocrystalline $Fe_{73.5}Cu_1Nb_3Si_{13.5}B_9$
By M. KNOBEL, J. P. SINNECKER, J. F. SAENGER, and R. SATO TURTELLI 861

Nucleation-and-growth process in $Fe_{80}B_{20}$ amorphous alloys
By F. MALIZIA and F. RONCONI 869

Non-equilibrium solid solution and nanocrystal structure of Fe–Cu alloy after plastic deformation under pressure
By V. A. TEPLOV, V. P. PILUGIN, V. S. GAVIKO and E. G. CHERNYSHOV 877

Magnetic and magnetoelastic properties of amorphous and crystalline $TbFe_2H_x$ hydrides
By A. YE. YERMAKOV, N. V. MUSHNIKOV, N. K. ZAJKOV, V. S. GAVIKO and V. A. BARINOV 883

Effect of multiple deformations on the amorphization of Ni–Zr diffusion couples
By G. MAZZONE, A. MONTONE and M. VITTORI ANTISARI 891

Entropy approach to the viscosity of undercooled metallic melts. Implications to the free-energy extrapolation
By F. Miani and P. Matteazzi 897

Copper clusters simulated by a many-body tight-binding potential
By G. D'Agostino 903

Structural relaxation in amorphous PdNiP. Chemical and topological ordering
By J. Sietsma, P. A. Duine and A. van den Beukel 913

Giant magnetoresistance of cobalt–silver metastable alloys prepared by sputtering and mechanical alloying
By S. M. Thompson, J. F. Gregg, C. R. Staddon, D. Daniel, S. J. Dawson, K. Ounadjela, J. Hammann, C. Fermon, G. Saux, K. O'Grady, S. J. Grieves, J. M. D. Coey and A. Fagan 923

Microdiffraction studies of nanocrystalline nitride films
By D. G. Rickerby 939

X-ray and neutron small-angle scattering. Investigation of nanophase vanadium–titanium oxide particles
By G. Albertini, F. Carsughi, C. Casale, F. Fiori, A. La Monaca and M. Musci 949

Copper–cobalt f.c.c. metastable phase prepared by mechanical alloying
By M. Baricco, N. Cowlam, L. Schiffini, P. P. Macrí, R. Frattini and S. Enzo 957

Anelastic and thermal properties of nanostructured aluminium prepared by mechanical attrition
By E. Bonetti and G. Valdre 967

Subject index 979

Index of authors 987
